

"Creating regional disaster management capabilities": TOHATSU Co., Ltd.

TOHATSU develop and manufacture portable fire pumps that are "small, lightweight and compact." They are also used by Japanese fire brigades. The portable fire pump enables quick fire-extinguishing activities at a fire site at the end of a path inaccessible to fire engines and helps improve the disaster risk reduction capabilities of the region.

"Easy-to-assemble safe and secure toilet booth of storage type for disasters": Kawahara Technical Research Co., Ltd.

Kawahara Technical Research have developed a public private toilet booth that is mostly made of paper and can be easily assembled. Biological agents placed in a septic tank reduce the risk of infectious diseases. The public private toilet booth is lightweight and able to assemble easily, even by two women, without using tools.

Section 5: Initiatives to Promote National Resilience

5-1 Decision of the National Resilience Annual Plan for 2019

The government reviewed the National Resilience Basic Plan (Decided at the cabinet meeting on December 14, 2018) and decided the first Annual Plan, "National Resilience Annual Plan for 2019" (hereinafter referred to as "Annual Plan 2019") on June 11, 2019.

The Annual Plan 2019 includes the following national resilience efforts to be implemented in FY2019: Major measures, such as embankment maintenance and improvement of earthquake resistance of houses, disaster

prevention and mitigation measures for small- and medium-sized enterprises, new support measures to eliminate utility poles, enhancing key performance indicators and introducing benchmark indicators to appropriately determine progress, etc. The government followed up the "Three-Year Emergency Response Plan for Disaster Prevention, Disaster Mitigation and Building National Resilience" (Decided at the cabinet meeting on December 14, 2018) and confirmed that it was expected to spend approximately 5 trillion yen, which is about 70% of the project budget of approximately 7 trillion yen, by FY2019 and that 35 emergency measures, such as block wall safety measures for school facilities, were expected to be completed by the end of FY2019. (Fig. 5-1-1)

5-2 Promotion of National Resilience Based on Disasters in FY2019

Natural disasters that cause enormous damage occur almost every year. Under such circumstances, the government continues to implement the "Three-Year Emergency Response Plan for Disaster Prevention, Disaster Mitigation and Building National Resilience" steadily to create a strong and flexible nation, capable of withstanding such disasters. A series of typhoon damage in 2019 revealed weaknesses in flood control. To further strengthen efforts for disaster prevention and mitigation and national resilience around this issue, the government used the supplementary budget for FY2019 and the budget for FY2020 to secure the necessary funds.

5-3 Support for the Formulation of Fundamental Plans for Regional Resilience

To effectively promote national resilience, it is crucial for local governments to play a central role in promoting regional resilience. Local governments are in the process of formulating their relevant Fundamental Plan for Regional Resilience (hereinafter "Regional Plan"). As of April 1, 2020, 411 municipalities in 47 prefectures had already formulated the Regional Plan while 1034 municipalities were in the process of doing

so (Fig. 5-3-1). Before local governments formulate their Regional Plan, the government held briefing sessions by national staff and supported efforts implemented by local governments based on their regional plans through 34 grants and subsidies under the jurisdiction of related ministries and agencies. From FY2020 onwards, the government has decided to further increase support through grants and subsidies to further promote the formulation of regional plans and regional resilience efforts.

5-4 Promotion of Private Sector Initiatives Contributing to National Resilience

Since FY2016, there has been a system under which companies and organizations actively implementing business continuity initiatives are certified by third parties as an Organization Contributing to National Resilience. The objective is to encourage private sector initiatives contributing to national resilience.

Meanwhile, in order to address a large-scale disaster, it is important to maximize the functionality of mutual support in society as a whole, rather than focusing solely on the self-help efforts by individual companies. In this view, a new system was established in July 2018 to certify Organizations Contributing to National Resilience that have made outstanding social contribution as Organizations Contributing to National Resilience (+ Mutual Support). By the end of March 2020, a total of 195 organizations received the certification (of which 92 organizations have been certified as Organizations Contributing to National Resilience (+ Mutual Support)).
