Please evacuate when an “Evacuation Instruction” is issued!
“Evacuation Recommendations” will no longer be used

Emergency Safety Measures (Alert Level 5)

Evacuation Recommendations will no longer be used.
From now on, all residents should evacuate from affected areas when or before Evacuation Instruction (Alert Level 4) is issued.

Elderly people, those with disabilities, and others who may need more time to evacuate should evacuate from affected areas when Evacuation of the Elderly, Etc. (Alert Level 3) is issued.

How can I safely evacuate?

Evacuation is more than simply moving to a safer location. It is also to withdraw from the affected area and to get somewhere safe. There are various measures of course you can take.

Check the Hazard Map to see whether the area is at risk.

Shelter Indicators

You can hold out as long as the water recedes and have sufficient supplies of water, food, etc. for 72 hours.

You may have to use water supplies from the public water supply system, such as water meters or other such water supplies. In addition, you may not be able to use electricity, gas, water, and other utilities.
