Please evacuate when an "Evacuation Instruction" is issued! "Evacuation Recommendations" will no longer be used.

Note 1: Alert Level 5 is rarely issued due to a number of reasons, such as municipal authorities being unable to accurately grasp the severity of a disaster.

Note 2: Evacuation Recommendations will no longer be issued. Instead, Evacuation Instructions will be issued.

Note 3: An Alert Level 5 indicates that everyone living in the evacuation area should prepare to evacuate if the Alert Level is raised. People who may have difficulty evacuating quickly or who feel that they are already in danger should proceed to evacuate as soon as possible.

Emergency Safety Measures (Alert Level 5) indicates a lifethreatening situation in which you cannot evacuate safely. Please evacuate before Alert Level 5 is issued.

Evacuation Recommendations will no longer be used. From now on, all residents should evacuate from affected areas when or before Evacuation Instruction (Alert Level 4) is issued.

Elderly people, those with disabilities, and others who may need more time to evacuate should evacuate from affected areas when Evacuation of the Elderly, Etc. (Alert Level 3) is issued.

Evacuate to an evacuation shelter or your local authority.

Evacuate to a friend or relative's home in a safe area.

How can I safely evacuate?

Evacuation more than usually should be available in a community, without our usual. The time of the evacuation is required to get somewhere safe. Evacuation will take a few hours of course of action you can take.

Check the hazard map to see whether the area is safe.

Check the hazard map to see whether the area meets the criteria for shelter individuals.

You can also find out the water rescuers and have sufficient supplies of water/flood, etc. (If you are in a car.)

You may be able to use electricity, gas, water, and other utilities.

Note: If the area is flooded and it is easy to use the flood. You may care to make your surroundings safe, etc., to make sure you are not caught in a floods.
